SUMMARY

Results-driven Django Developer with expertise in building robust back-end systems and scalable web architectures. Proficient in architecting RESTful APIs and optimizing database performance to deliver high-quality software solutions. Committed to implementing clean code standards and contributing to innovative, real-world development projects.

EXPERIENCE

Web Development Intern

Digital Empowerment Network (DEN)

July 2025 – September 2025, Remote

- Collaborated in a professional remote environment to design and implement back-end logic for web-based applications.
- Architected server-side components and managed database integrations using Python-based frameworks.
- Enhanced application performance and reliability by adhering to industry-standard software development lifecycles.
- Demonstrated technical adaptability and a commitment to professional excellence through high-impact task delivery.

PROJECT

EduSphere

Live Link <https://edusphares.pythonanywhere.com/>

- Engineered a comprehensive, multi-role LMS featuring specialized dashboards for Administrative, Faculty, and Student users.
- Implemented secure Role-Based Access Control (RBAC) to govern data privacy and user permissions across the platform.
- Integrated sophisticated course management modules, enrollment tracking systems, and student progress analytics.
- Leveraged Django ORM and PostgreSQL to ensure scalable data handling and efficient query execution.

Online Quiz System

- Developing an automated assessment engine featuring timed examinations, real-time scoring, and performance tracking.
- Architecting a modular back-end with REST API endpoints for seamless quiz delivery and asynchronous submission handling.
- Building an administrative control center for global question bank management and multi-category data organization.

EDUCATION

Bachelor of Science in Computer Science (BS-CS)

University of Swabi • KPK, Pakistan • 2026

SKILLS

Languages: Python, JavaScript, SQL

Frameworks: Django, Django REST Framework (DRF)

Databases: PostgreSQL, SQLite, MySQL

Tools & DevOps: Git, GitHub, PythonAnywhere (Deployment)

Core Concepts: REST APIs, MVT Architecture, ORM, JWT Authentication, Responsive Design
